Famhost Fleet and Management Hosting was developed as part of the JaRay Software system over 20 years ago. When JaRay was acquired by ServiceTitan in 2018, we took the opportunity to redesign our entire system to utilize the best in the latest wireless technologies, equipment, and software. Whether you want to track your fleet of trucks, assets, reefers, containers or equipment, we provide hardware, software and integration for any of your needs.

We are the full deal! We can also host and integrate data from all your software into one place. Visit Famhost.com for more details.

We are locally owned and operated from Wichita Kansas and serve customers throughout North America and Canada.
